Recent Actions	
The expulsion in July of two Soviets for industrial	
comionage was the latest and most visible development in Japan's	
increasing afforts to restrict technology transfer. During the	
mack mind months. Tokyo has also curtalled entralice visus (U)	
Soviet visitors and tightened travel restrictions on soviet	25X1
scientific and technical delegations.	23 X I
In addition, Tokyo has allocated additional manpower and	
funds for enforcement and improved coordination among the	
the Consign Ministry has established a special group in 165	
Soviet Division to study the problem and to coordinate activities	25X1
with MITI and the security agencies.	23 X I
The Foreign Ministry has emerged as the most active	
proponent of these precautions, overshadowing trade officials who

have viewed technology exports solely in commercial terms. Japanese officials were apparently concerned that failure to respond to recent crackdowns in the United States and Western Europe left Japan open to criticism that it was not doing its part. The Foreign Ministry has thus raised technology transfers from a trade administration matter to a broader foreign policy issue. Both Prime Minister Nakasone and Chief Cabinet Secretary Gotoda are more sensitive than their predecessors to the contribution Western technology makes to the growth of the Soviet military power. Using the bluntest language yet from Tokyo, Foreign Minister Abe recently reaffirmed Tokyo's commitment to reducing illegal outflows of technology.	25X1 25X 25X1
The USSR's Response	
To date Moscow has taken no reprisals for the explusions and new measures. The Soviets have continued to stress the need for improved relations, even while strongly criticising Tokyo's stand on foreign policy and defense issues.	
The Soviets are likely to continue trying to persuade Japanese firms to circumvent COCOM restrictions and will probably increase pressure on the friendly and specialized trading firms which depend on trade with the USSR. Continuing Efforts Tokyo is considering even tighter review of high-technology exports, stricter interpretation of COCOM guidelines, and more thorough inspections of shipments of electronics parts to the USSR. The Foreign Ministry is preparing a campaign to acquaint	25X1

the business community with the Soviet collection effort and its implications for Japan's national security. As part of the effort, the Ministry plans to publish a pamphlet containing examples of technology transfers of strategic importance.	25X1
China	25X1
Japan is a major source for Chinese imports of high technology and related equipment. Although the United States will continue to dominate the Chinese high technology market for the near term, Japan, as China's largest trading partner overall, could become a serious competitor to US interests by the end of the decade. This is particularly true in microelectronics and telecommunications where both the United States and Japan produce state-of-the-art products. We believe Tokyo will continue to follow the lead of the	25X1
United States and international bodies such as COCOM in determining an acceptable level of high technology trade with China. At the same time, Japanese businessmen will continue to press for a liberal interpretation of dual-use technologies. Japanese business interests can be expected, in particular, to take advantage of any improvement in the Chinese-Western political atmosphere to expand and promote their trading interests.	25X1
